

Eugene Baldonado

Potential worries in your email:

<https://www.ppic.org/blog/geography-of-educational-attainment-in-california/> - Article that helped me look through to see how “sticky” the x variable would be, which shows there are some differences between educational attainment levels when controlling for state-fixed effects

i) Regression on how levels of educational attainment affect Violent crime rate across states in the U.S.

ii)

Data on state level educational attainment:

(2020)

<https://www.census.gov/data/tables/2020/demo/educational-attainment/cps-detailed-tables.html>

(2021 also if I can find the violent crime rate data on 2021)

<https://www.census.gov/data/tables/2021/demo/educational-attainment/cps-detailed-tables.html>

Data on state level Violent Crime Rate:

(2020)
